

THE FEDERAL POLYTECHNIC MUBI
SCHOOL OF SCIENCE AND TECHNOLOGY
DEPARTMENT OF COMPUTER SCIENCE

REVISED 2024

INTRODUCTION:

All graduating students of ND/HND programmes of computer science department are expected to write a project before graduating in accordance to the following guidelines:

- i. All projects should be accompanied by a program.
- ii. A student is expected to defend his/her project at the end of semester four.
- iii. Three copies of the complete project work with a program (on CD or laptop) is to be presented to the panel at the venue of the defense.
- iv. **Four Pink color of hard cover bounded** copies for ND/HND project work to be submitted to the department after necessary corrections and approval by the supervisor **not later than two (2) weeks after defense.**
- v. The project should consist of five chapters.

NOTE: No student should directly submit his/her project to the HOD without passing through his/her supervisor.

TYPING FORMAT: The project is to be typed using word processor and printed on A4 paper with the following format:

- i. Font style: Times New Romans,
- ii. Line spacing: 1.5
- iii. Font size: 12
- iv. Headings: Bold, center alignment
- v. Body of Text: justify alignment
- vi. Left margin: 1.5"
- vii. Right, Top, and bottom margins: 1"
- viii. Block paragraph
- ix. No bullet should be used e.g. √
- x. No Editing of codes, (paste them as they appear in program)
- xi. Use bottom Centre numbering format
- xii. Number the preliminary pages in Roman Numeral
- xiii. Title page - separate
- xiv. Declaration - separate page
- xv. Certification –separate page
- xvi. Dedication - separate page
- xvii. Acknowledgement - a separate page(acknowledge persons according to ranking)
- xviii. Abstract - a separate page(single line spacing, italics, and no paragraphing)
- xix. Table of contents - (as contained)

COVER PAGE (No need to write COVER PAGE on top of the page)
WRITE YOUR PROJECT TOPIC HERE
(WRITE YOUR CASE STUDY HERE)

BY

STUDENT'S NAME
REGISTRATION NUMBER

DEPARTMENT OF COMPUTER SCIENCE,
SCHOOL OF SCIENCE AND TECHNOLOGY,
FEDERAL POLYTECHNIC, MUBI
ADAMAWA STATE, NIGERIA

MONTH, YEAR

TITLE PAGE (No need to write TITLE PAGE on top of the page)
WRITE YOUR PROJECT TOPIC HERE
(WRITE YOUR CASE STUDY HERE)

BY

STUDENT'S NAME
REGISTRATION NUMBER

DEPARTMENT OF COMPUTER SCIENCE,
SCHOOL OF SCIENCE AND TECHNOLOGY,
FEDERAL POLYTECHNIC, MUBI
ADAMAWA STATE, NIGERIA

IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR THE AWARD OF
HIGHER NATIONAL/ NATIONAL DIPLOMA (HND/ND) IN COMPUTER SCIENCE

MONTH, YEAR

DECLARATION

I hereby declare that the work in this project titled “***write your topic here***” was performed by me under the supervision of Mr. Abc Xyz. The information derived from literatures has been duly acknowledged in the text and a list of references provided. The work embodied in this project is original and had not been submitted in part or in full for any other diploma or certificate of this or any other institution.

Student's name
(Reg. no.)

Signature

Date

CERTIFICATION

This project work titled “*write your topic here*” meets the regulations governing the award of National Diploma (ND)/Higher National Diploma (HND) in Computer Science, Federal Polytechnic Mubi, Adamawa State.

Supervisor’s Name
(Project Supervisor)

Sign/Date

HOD’s Name
(Head of Department)

Sign/Date

External Examiner’s Name
(External Examiner)

Sign/Date

DEDICATION

Dedicate your project work to whosoever (human) but should be a single line statement.
However maximum of three lines statement can be tolerated.

ACKNOWLEDGEMENTS

Acknowledge the people that contributed (in anyway) to the success of your studies and project work.

Maximum of two pages.

TABLE OF CONTENTS

CERTIFICATION.....	iii
DEDICATION.....	iv
ACKNOWLEDGEMENT.....	v
TABLE OF CONTENT.....	vi
LIST OF TABLES.....	vii
LIST OF FIGURES.....	viii
ABSTRACT.....	ix

CHAPTER ONE

INTRODUCTION

- 1.1 Background to the study
- 1.2 Problem statement
- 1.3 Aim and Objectives
- 1.4 Significance of the Study
- 1.5 Scope of the Study
- 1.6 Definition of some Operational Terms

CHAPTER TWO

LITERATURE REVIEW

- 2.1 Introduction

CHAPTER THREE

SYSTEM ANALYSIS AND DESIGN

- 3.1 Introduction
- 3.2 Disadvantages of the existing system
- 3.3 Advantages of the proposed system
- 3.4 Software development model
- 3.5 Methods of data collection
- 3.6 System design

- 3.6.1 Algorithm
- 3.6.2 System architecture
- 3.6.3 Database tables/queries structures (Optional)
- 3.6.4 Entity relationship modeling (Optional)
- 3.6.5 Database entity relationship diagram (Optional)
- 3.6.6 The input and output design
- 3.6.7 Show report layout (Optional)
- 3.7 System requirement specification
 - 3.7.1 Hardware requirement
 - 3.7.2 Software requirement
 - 3.7.3 Personnel requirement

CHAPTER FOUR

RESULTS AND DISCUSSION

- 4.1 Introduction
- 4.2 Results
- 4.3 Discussion
- 4.4 User manual
 - 4.4.1 System Installation
 - 4.4.2 System operational guide

CHAPTER FIVE

SUMMARY, CONCLUSION AND RECOMMENDATIONS

- 5.1 Summary
- 5.2 Conclusion
- 5.3 Recommendations

APPENDIX

LIST OF FIGURES

List all your figures here including their title. For example:

Figures	Page
1.1: Waterfall model	1
1.2: Spiral model	
2.1: System diagram	
...	

Note: All titles must be written below the figure in the body

LIST OF TABLES

List all your tables here including their title. For example:

Tables	Page
1.1: Registered students list	1
1.2: Students list	
2.1: Class list	
...	

Note: All titles must be written above the table in the body

ABSTRACT

Insert your abstract here. It should be a single block that comprises of very brief introduction, the problem(s) that you've addressed or gap that you filled including your aim, the method used in your study, the result(s) of the study, and recommendation(s).

It should not be more than a page, single line space, italicize and justify.

CHAPTER ONE

INTRODUCTION

1.1 Background to the study

Write a clear introduction to the problem at hand in order to provide the required information for understanding the problem at hand. This also gives direction and helps in planning the project work. Background to the study should provide broad information on the development and circumstances surrounding the problem at hand:

- i. It should not be too long; about one and half to 3 pages depending on the topic and scope of the study
- ii. The rational of the study should be indicated to help establish the existence of problem to be investigated.
- iii. It should be sequenced and backed by expert's opinion (citation).

1.2 Problem statement

- i. You should state clear evidence for existence of the problem and justification for undertaking the study.
- ii. This should be presented as declarative statement(s) or in question forms.
- iii. It should be stated in single statement or several statements. It should not exceed half a page.

1.3 Aim and Objectives

- i. State what you intend to do (your aim) toward providing solution to the problem identified above.
- ii. The objective of the study should be broken into specific items to represent what you intend to do in order of importance. Usually, three to five items are considered adequate.

1.4 Significance of the Study

Write the benefits of your project work as a justification for embarking on the study. These benefits should be discussed in paragraphs, showing who will benefit from the project and how it will benefit them (either directly or indirectly). ***Not more than a page.***

1.5 Scope of the Study

Indicate the content limit or extent of coverage of the study. It should clearly outline the boundaries or dimensions of the study for purpose of direction.

1.6 Definition of some Operational Terms

In project writing, key terms, words or phrase are defined operationally in order to minimize the scope for doubt and confusion in interpretation. Such definition should however be simple and brief.

Terms to be defined should be arranged in the **alphabetical order, written in lower case and underlined or in upper case without underlining.**

For example:

System: This is any collection of component elements that work together to perform a task.

CHAPTER TWO

LITERATURE REVIEW

2.1 Introduction

This chapter intends to equip the project with knowledge of research works done by other writers on the problem; the aspect they have studied, approaches they have used, and the results they produced. The review therefore aid the project writer to select a problem, design instruments, formulate hypothesis, analyze data, and expand upon the context and background of the study.

Generally, review or related literatures may take either of these approaches:

1. In one of the approaches, the project writer may divide the whole chapter into subsections with appropriate subheadings based on the main concepts and variables of the problem.
2. The other approach required that the material is presented in different paragraph, with no headings. The choice of using either of the approaches however depends on the materials required by the project problem.

If the review is done on the basis of sub-heading, a conclusion can be drawn and the implications of each sub-heading for the project study shown before proceeding. The review is centered on a major topic, the conclusion and the implications can be discussed at the end of the chapter.

Whatever approach is used, the material reviewed should be organized so that the idea flows in sequence. This requires the project writer to select publications carefully in order to sort out relevant ideas, facts and any other useful information.

A Literature Review should:

1. Compare and contrast different authors views on an issue
2. Group authors who draw similar conclusion
3. Identify areas where authors disagree
4. Critic extant literature e.g. in aspects of methodology
5. Identify gaps in research

Purpose of Literature Review

1. To establish what is already known about a topic
2. Prevent reinventing an already existing work
3. Expose gaps in the literature and thus define and limit the problem to be solved
4. Place studies in historical perspective
5. To relate a study (been conducted) to previous research

Citing sources (Avoid plagiarism i.e. Copy of another person's ideas, text or other creative work, and presenting it as one's own without permission)

There are generally two ways to integrate source materials with your work:

1. Citing source within the text. For example,
Kaka (2013) revealed that accidents are mostly caused by reckless driving.
2. Citing source at the end of the statement. For example,
Accidents are mostly caused by reckless driving (Kaka, 2013).

2.2 Summary of Literature Review

This section contains the summary of gaps identified/observed in the literatures reviewed.

CHAPTER THREE

SYSTEM ANALYSIS AND DESIGN

3.1 Introduction

The introduction is a brief summary of what you intend to do in chapter three.

3.2 Disadvantages of the existing system

This should discuss the problems associated with the existing system or model.

3.3 Advantages of the proposed system

This should outline the expected benefits of the proposed system with respect to the problems identified above.

3.4 Software development model

Explain how you utilized the steps/phases/stages of the chosen model based on your topic.

3.5 Methods of data collection

Outline your method of data collection.

3.6 System design

3.6.1 Algorithm diagrams

Draw the necessary UML diagrams to capture your system operation.

3.6.2 System architecture

Draw a detailed architectural model of the new system.

3.6.3 Database tables/queries structures (Optional)

This depends on the nature of the problem.

3.6.4 Entity relationship modeling (Optional)

This depends on the nature of the problem.

3.6.5 Database entity relationship diagram (Optional)

This depends on the nature of the problem.

3.6.6 The input and output design

Show all your input and output form layout (Draw diagrams using MS-Word tools).

Note: Do not use captured screenshots from the program.

3.6.7 Show report layout (Optional)

This depends on the nature of the problem (Draw diagrams using MS-Word tools).

Note: Do not use captured screenshots from the program.

3.7 System requirements specifications

3.7.1 Hardware requirements

The hardware requirement should include processor speed, hard disk capacity, RAM, VGA resolution, printers, scanner, digital camera etc.

3.7.2 Software requirements

The software requirement will include the operating system, programming language/compiler, database packages, web design packages, web server, text editors etc.

3.7.3 Personnel requirements

Define the use(s) of the system.

CHAPTER FOUR

RESULTS AND DISCUSSION

4.1 Introduction

Explain your new system's operation that leads to the results below.

4.2 Results

Use test data to display your main result from screenshots (output) and label as figures.

4.3 Discussion

Discuss the result(s) with respect to the figures labeled in 4.2 above.

4.4 User manual

4.4.1 System Installation

Write the steps that a user should follow to install the new system.

4.4.2 System operational guide

Write the expected steps/procedure to follow to install and operate the new system.

CHAPTER FIVE

SUMMARY, CONCLUSION AND RECOMMENDATIONS

5.1 Summary

Summarize your complete project in order to give a comprehensive view of the project.

5.2 Conclusion

The **conclusion** should confirm to the reader that the **project's** purpose has been achieved.

You can usually do this in one paragraph.

5.3 Recommendations

This section gives a list of recommendations that reflect the conclusions.

The recommendations are in descending order of importance.

REFERENCES

APA Style

Within the text, references in the body of the text are made to acknowledge the source of writing which is taken from other books, articles or papers. The complete bibliographical details are recorded in the list of references at the end of the project. The references cited in the text should be indicated using the **AUTHOR-YEAR** system. In this system, references within the text must include only the **Author** and **Year** of publication.

Single Author

The surname of the author followed by the year of publication is written in the relevant place in the text. If the name of the author is written as a part of a sentence, the year published should be written in parentheses. For instance Noor (2017) stated that

In a study on the design of algorithm in network security (Chika, 2018)

Multi-authors

Where the work of two authors is referred to, then both names must be mentioned each time it is referred to:

(i) Roseline and Dare (2018) carried out their study on

(ii) It has been established in (Rahman & David, 2016), that.....

How to list references

List of references is arranged in alphabetical order by Authors surname. Use APA (American Psychological Association) style of referencing.
